GIOVANNI GABRIELI

c. 1554/57–1612

Canzon quarta a 4

Ch. 189

for two Trumpets in C or B♭ and two Trombones

from Canzoni per sonare con ogni sorte di stromenti
Venice: Alessandro Raverii, 1608

Edited, with editorial dynamics, preface, and commentary,
by Christopher Delgado

SCORE

Performing edition. Musical text not collated with the 1608 partbooks.

TRUMPETOWN EDITION

Giovanni Gabrieli, *Canzon quarta a 4*, Ch. 189. From *Canzoni per sonare con ogni sorte di stromenti* (Venice: Alessandro Raverii, 1608).

Performing edition. The musical text is a modern arrangement for brass quartet and has not been collated with the 1608 partbooks. The dynamics, which are all editorial and printed in square brackets, and the preface and commentary are the present editor's.

Editorial dynamics, preface, and commentary: © 2026 Christopher Delgado, released under CC BY-SA 4.0.

Facsimile plates reproduced from public-domain scans of the 1597 and 1608 prints (IMSLP).

Parts available: Trumpet 1 and Trumpet 2, each in C and in B♭; Trombone; Bass Trombone.

TRUMPETOWN EDITION

TE-004

Arrangement after M. Rondeau, IMSLP (Werner Icking Music Collection), CC BY-SA 4.0.

PREFACE

The source, the instruments, and the question of dynamics

The source

The *Canzon quarta* is the last of four four-part canzonas by Giovanni Gabrieli that open Alessandro Raverii's anthology *Canzoni per sonare con ogni sorte di stromenti a quattro, cinque, & otto, con il suo basso generale per l'organo*, printed in Venice in 1608 (Plate 1). The collection gathers thirty-six canzonas by Gabrieli, Claudio Merulo, Gioseffo Guami, Girolamo Frescobaldi, and others, with a *basso generale* for the organ. Gabrieli is represented by the four canzonas *a 4* (Ch. 186–189) and by two canzonas *a 8* (Nos. 27 and 28). The catalogue numbers are those of Richard Charteris.[1]

The title page calls for performance *con ogni sorte di stromenti*, "with every kind of instrument." In Venetian practice around 1600 that meant, above all, cornetts and trombones, the core of the instrumental establishment at San Marco, alone or doubled by strings and organ.[2] A quartet of two trumpets and two trombones is a modern descendant of that sound, and the present edition is written for it.

The question of dynamics

The 1608 print contains no dynamic indications of any kind (Plate 2). That silence is not evidence that the music was played at one level. As Matthias Thiemel puts it in *Grove Music Online*, dynamic variation "can normally be assumed even when indications for it are mainly or even entirely absent from the notation," and already in the Renaissance "dynamic values were reflected in changes in the number of voices and their registers."[3] Gabrieli himself is the best witness. In the *Sacrae symphoniae* of 1597 he printed the words *Pian* and *Forte* in the parts of the *Sonata pian e forte* (Plate 3), and the placement is systematic: a single choir sounding alone is marked *pian*, and the two choirs together are marked *forte*. Dynamic level follows the number of choirs sounding.

Michael Praetorius, writing in 1619 for German musicians learning the new Italian music, confirms the principle. The Italians, he reports, mark *forte* and *piano* in their parts "because of the changes in both voices and choirs," a practice he approves, provided it is used with moderation.[4] The instruments were equal to it. Girolamo Dalla Casa, the first director of instrumental music at San Marco, wrote in 1584 that the cornett "is played piano and forte and in every sort of key, just as the voice." Jamie Savan, who translates the passage, suggests that the two words described tone quality, soft and hard, as well as level.[5]

Every dynamic in this score is therefore editorial, every one is printed in square brackets, and each is justified in the Commentary. The edition follows the practice Thomas Hiebert singled out for praise, in which editorial suggestions are "clearly differentiated" from the source.[6] Players who prefer the bare text can ignore the brackets.

Principles of the editorial dynamics

Gabrieli's *Sonata pian e forte* is written for two choirs; this canzona is written for one. The edition extends the principle of the sonata to a single four-voice texture by analogy, and states openly that it does so. The rules are those of the first volume of this series (TE-001), applied to a piece whose opening returns almost unchanged at the end.

Texture determines level. Where voices drop out and a new point of imitation is entered by single voices, the level is [*p*] or [*mf*]. Where all four parts join in rhythmically unified writing, it is [*f*]. Where the scoring alone produces the increase, as in the opening exposition, no marking is printed; [*f*] appears only where the voices also move together.

Changes of level fall at the seams. Changes of level fall at cadences and at the start of new points of imitation, not in the middle of a phrase. Where a voice runs on across a cadence, its marking is placed at the start of its next phrase. This is not a claim that the music was played in flat blocks of sound. Thiemel calls the twentieth-century idea of "terrace dynamics" erroneous, and the period sources describe the swelling and fading of the voice and of wind instruments: Caccini's *crescere e scemare della voce*, and Fantini's instruction of 1638 that long notes on the trumpet be held "in a singing fashion," swelling to the middle of the note and fading again.[7] The brackets mark only the level from which such shaping starts. No hairpins are printed; the shaping is left to the players.

A rounded form. The subject enters from the trombones upward: trombone, bass trombone, second trumpet, first trumpet (bars 1–3). In bar 32 the trombone restates the subject over the cadence, and bars 33–38 repeat bars 2–7 note for note, so that the canzona ends as it began, and a short coda (bars 39–42) closes on B-flat. The reprise receives the same [*mf*] at each entry as the exposition.

One exchange between the pairs. In bar 12 the trumpets play alone; from the end of bar 13 into bar 14 the trombones answer with the same music an octave lower. This is the one place where the canzona divides into two choirs, and it is marked as the *Sonata pian e forte* would mark it: each pair sounding alone [*p*], both pairs the same, so that the answer is never an echo of the statement.

The [f] span. From the cadence on F in bar 24 the writing turns chordal, with repeated-note chords in bars 25–26, and before the reprise all four parts move in crotchets in one rhythm (bar 30, the first trumpet from beat 2). The span is marked [*f*] from bar 24 to the return of the subject in bar 32. Its middle is looser: the bass trombone rests from the middle of bar 26 to the end of bar 27, and bars 27–29 are imitative. The edition nonetheless holds the level. The cadence on B-flat at bar 29 is not followed by a new point of imitation: the three lower parts run straight through it into the chordal close of bars 30–31, so there is no new section at which to change level.

Balance on modern instruments

The trumpet and trombone of today are louder and more brilliant than the cornett and sackbut, and the cornett in particular was prized for its likeness to the human voice. The bracketed dynamics should therefore be read as relationships, not as absolute levels. A bracketed [*f*] in this music is the full, rounded sound of a cornett and sackbut ensemble, not a modern orchestral forte. Period-instrument players have argued for more range, not less: the cornettist Jean Tubéry, recalling "what Dalla Casa says about playing loud and softly," suggested that players "can go further in that direction."[8] Modern players should explore the full range between [*p*] and [*f*] while keeping the relationships between the parts.

7 Thiemel, "Dynamics," §§1–3; Giulio Caccini, *Le nuove musiche* (Florence, 1602), preface, ed. H. Wiley Hitchcock (Madison: A-R Editions, 1970; 2nd ed., Middleton, WI: A-R Editions, 2009); Girolamo Fantini, *Modo per imparare a sonare di tromba* (Frankfurt, 1638), 3, as translated in Steven E. Plank, "Trumpet and Horn," in *A Performer's Guide to Seventeenth-Century Music*, ed. Stewart Carter, rev. and expanded by Jeffery Kite-Powell, 2nd ed. (Bloomington: Indiana University Press, 2012), 143–44. A sign for the swell and decay of a single note appears in print only later, in Domenico Mazzocchi's madrigals of 1638.

8 Susan Smith, "A Cacophony of Cornettists," *Historic Brass Society Newsletter* 9 (1996): 26–32, at 28. Conversation with Michael Collver, Bruce Dickey, Stephen Escher, Douglas Kirk, Jean Tubéry, and Jeremy West.

Dynamics in the hands of players

Musicians of Gabrieli's own generation added dynamics to his music where the print had none. In a score book begun in 1599, the Augsburg composer and teacher Adam Gumpelzhaimer copied Gabrieli's ten-voice motet *Domine exaudi orationem meam* from the *Sacrae symphoniae* of 1597. The book names its players, on instruments that include cornetts, trombones, and a bassoon, and Gumpelzhaimer supplied dynamic indications throughout, alternating *Pian* and *Forte*. Richard Charteris, who describes the source, reads it as "a record of how the instrumentalists treated this work."[9] Bruce Dickey notes that *piano* and *forte* in music of the period usually mark echo effects or the contrast of tutti and solo sections, and Gary Towne writes that dynamic markings of the period "merely signal to players the size of the ensemble playing at any given moment," and warns against over-interpreting them.[10]

The instruments and their model

In their practical guide of 1975, Clifford Bartlett and Peter Holman observe that Gabrieli and his contemporaries treated the cornett and the violin as alternatives, and conclude that it is "far better to replace them with violins than with anachronistic oboes or trumpets."[11] This edition answers the objection in how the trumpets are played. Dickey, writing for players of the cornett and sackbut, names the human voice as "the principal model (and not the modern trumpet or trombone!)" for tone, articulation, and dynamic range.[12]

The title page advertises *il suo basso generale per l'organo*, and Bartlett and Holman call the organ "the obvious accompanying instrument" in church music of the period.[13] The arrangement omits it; an organist reading from the *basso generale* would restore a sound the print provides for.

Articulation

Dickey identifies articulation as the area in which modern and historical playing differ most. Wind players of the period used pairs of unequal syllables, *te che*, *te re*, and *le re*, in a kind of double tonguing whose aim was not evenness but inequality: metrically strong, consonant "good" notes slightly stressed, weak and passing "bad" notes unstressed. Dickey recommends a compound tonguing for "all notes of the speed of eighth notes or faster," with repeated and leaping notes single-tongued; for *re* he suggests the soft *t* of a relaxed American "water."[14] The arrangement halves the note values of the print (its semiminims appear here as quavers), so Dickey's eighth notes are the semiquavers of this score.

Tempo

The print gives no tempo. Its notation, under the cut C and full of semiminims and fusae, is what George Houle calls "canzona style." Houle explains that such music was beaten with the tactus on the semibreve, and that this tactus was taken slower than in music notated in long values, "so as not to rush the fast notes"; he cites Marin Mersenne's normative tactus of 1636, "about MM 60."[15] One original tactus is thus one minim of this score, and the arranger's crotchet = *circa* 82 puts the tactus at about 41 a minute, slower than Mersenne's norm. The editor suggests a minim pulse, one to each tactus.

COMMENTARY

The editorial dynamics, bar by bar

Sources. *R* = *Canzoni per sonare con ogni sorte di stromenti* (Venice: Alessandro Raverii, 1608), partbooks Canto, Alto, Tenore, Basso, Basso generale; consulted for the absence of dynamics only; the musical text has not been collated. *SS* = Giovanni Gabrieli, *Sacrae symphoniae* (Venice: Angelo Gardano, 1597), *Sonata pian e forte*, cited as the model for texture-based dynamics. *T* = the modern arrangement used for the musical text (see imprint).
Abbreviations. Tpt 1, Tpt 2 = Trumpets (parts in C and in B♭); Tbn = Trombone; B Tbn = Bass Trombone (in the score: Tpt. in C 1, Tpt. in C 2, Tbn., B. Tbn.); all = all four parts. Bar numbers follow *T*.

Bar	Part	Marking and rationale
1, 1, 2, 3	Tbn, B Tbn, Tpt 2, Tpt 1	[*mf*] at each entry of the subject (Tbn bar 1, B Tbn bar 1 beat 3, Tpt 2 bar 2 beat 2, Tpt 1 bar 3 beat 2). The exposition builds from one voice to four; the increase is written into the scoring, so no further marking is printed. The second statement of the subject's head in stretto after the cadence in bar 8 (Tpt 2 bar 8, Tbn bar 8, B Tbn bar 9) stays at this level.
12, 13	Tpt 1, Tpt 2; Tbn, B Tbn	[*p*]. The trumpets play bar 12 alone; the trombones enter at the end of bar 13 (beat 3½) and play bar 14 alone, an octave below the trumpets' bar 12. Each pair sounding alone is treated as a choir sounding alone (*SS*: *pian*); both receive the same level.
15, 16, 18	Tpt 2, Tpt 1, Tbn, B Tbn	[*mf*] as each voice re-enters the four-part texture after the exchange: Tpt 2 bar 15 beat 2; Tpt 1 bar 16 beat 1½; Tbn bar 16 beat 3½, after its rest; B Tbn bar 18, after its rest.
24	all	[*f*]. On the cadence on F (Tbn on beat 2, after its tied note), as the writing turns chordal: repeated-note chords in bars 25–26, the three upper parts in one rhythm in bar 26 through beat 3, and all four parts in one rhythm in bar 30 (Tpt 1 from beat 2). The level holds through the cadence on B-flat at bar 29, which the three lower parts run through into the chordal close (see Preface). The level ends at the reprise in bar 32. *SS*: both choirs together = *forte*.
32–34	Tbn, B Tbn, Tpt 2, Tpt 1	[*mf*] at each entry of the reprise (bar 32 restates the subject over the cadence; bars 33–38 = bars 2–7): Tbn bar 32, whose first note is both cadence and subject; B Tbn bar 32 beat 3; Tpt 2 bar 33 beat 2; Tpt 1 bar 34 beat 2. The same marking as the exposition.

Markings deliberately not added

No hairpins (see Preface). No echo effects: the reprise is marked as the exposition is. The trombones' [*p*] of bars 13–14 lapses at each trombone's next phrase (Tbn bar 16, B Tbn bar 18). No final [*f*]: the coda (bars 39–42) continues the reprise and closes on a held chord that needs no marking. No dynamic for the final fermata. No articulation has been added to *T*.

Editorial method

This is a performing edition. The musical text is a modern arrangement for brass quartet (see the imprint page), which sets the four partbooks for two trumpets and two trombones. Its pitch level, note values, barring, metre signatures, tempo indication (*Moderato*, crotchet = *circa* 82), the alto clef for the trombone, and the final fermata belong to the arrangement and do not appear in this form in the 1608 print, which is notated in the long note values and unbarred partbooks of the period. The text has not been collated with the four Raverii partbooks, and the assignment of the partbooks to the four modern parts has not been verified. The present editor's contribution is confined to the bracketed dynamics, the preface, and the commentary.
